

## Belluno Payments Integration Module

### ***User Guide***

---

#### **Module Settings**

Access the Magento Administrative Panel on the side menu click on **Stores**, then click on **Configuration**, next click on **Sales** and **Payment Methods**.

Scroll down until you find **Belluno Custom Payment**.

So you will have five configurations. *Follow the next steps to understand.*

#### **1 - Belluno Config**

##### **Belluno Config**

<b>Environment</b> <small>[store view]</small>	<input type="text" value="Sandbox - Environment for"/>	<input type="checkbox"/> Use system value
<b>Sort Order</b> <small>[website]</small>	<input type="text" value="1"/>	

- **Environment:** this option gives the possibility to place the module in a test environment or production environment.
  - **Production** - production environment;
  - **Sandbox** - test environment;
- **Sort Order:** this option lets you select an order that the method will appear at checkout. The smaller will appear first.

#### **2 - Belluno Authentication**

## Belluno - Authentication

Authentication Token

eyJ0eXAiOiJKV1QiLCJhbGciOiJSUz

☐ Use system value

Public Key Konduto  
[store view]

|

☐ Use system value

This field must be made available by the Konduto support team.

- **Authentication Token:** Belluno support team must provide a valid token for your environment.
- **Public Key Konduto:** this field must be provided by the Konduto support team, but Belluno makes the request to Konduto.

## 3 - Belluno - Credit Card

### Belluno - Credit Card

Enabled  
[website]

Yes

☐ Use system value

Rule of Capture

Belluno - Credit Card

☐ Use system value

Capture tax document (CPF or CNPJ) in the payment form?  
[store view]

No

☐ Use system value

- **Enabled:** this option gives the possibility to activate and deactivate the module.
  - **Yes** - activated;
  - **No** - disabled;
- **Rule of Capture:** here you define whether the capture will be automatic or manual.
  - **Authorize** - in this option the captures must be done manually by the administrator. It only authorizes purchases.
  - **Authorize and Capture** - in this option the authorization and capture are done automatically.

- **Installments:** here you can add or decrease the amount of installments that will be available.  
In each installment it is possible to put a number that will represent the percentage of interest on the total amount.
  - **Observation:** the **number** applied will always add the percentage referring to the **total amount** of the order, **NOT** the total amount with interest from the **previous installment**.
- **Minimum value of installment:** this will be the minimum possible value of a single installment.
- **Title:** in this field you can change the name that will appear at checkout.
- **Capture tax document:** this field allows you to configure whether the client is to fill in your document or not.
  - **Yes** - customer will have to fill in their document at checkout.
  - **No** - customer will not have to fill in their document at checkout.
  - **Observation: IF YOU MARK NO**, you must set the field "**Show Tax/VAT number**" as mandatory.

- **Show Tax/VAT number:** Stores -> Configuration -> Customers -> Customer Configuration -> show Tax/VAT Number . **REQUIRED.**

Show Tax/VAT Number [website]  ☐ Use system value
